# UDEN-S® HEATERS

harmony of styles, warmth and comfort

Welcome to the exciting world of cost-saving ceramic UDEN-S heaters! This is an implemented revolutionary solution for comfortable heating of your dwellings!

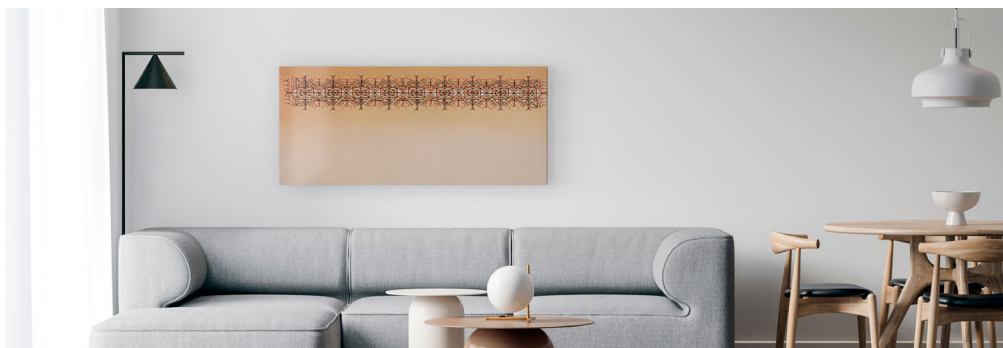

We present you innovative heaters which not only provide warmth and comfort but also combine reliability, operating saving, and aesthetic appearance.

UDEN-S products offer a wide variety of heaters to satisfy all your heating needs. Our product range includes wall- and ceiling-mounted heaters, designer heaters, as well as heating wall bases and heated towel rails. All of these options have provided heating solutions for apartments, private houses, social, and commercial facilities for our clients for many years.

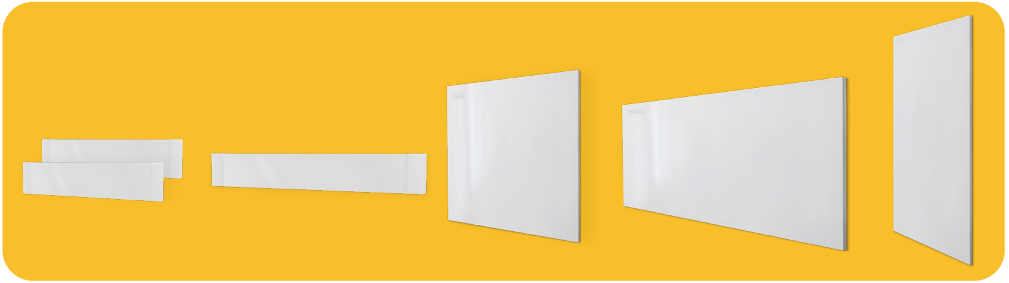

2

What makes UDEN-S heaters unique? Our panels redefine the conventional idea of what a heating system should look like, making your living space distinctive and sensoramic.

Experience the pleasure of warmth created by modern heating systems and enjoy the attractive benefits offered by UDEN-S heaters. Treat yourself to living in a cozy and stylish place where warmth and beauty prevail!

# OPERATING PRINCIPLE OF UDEN-S® HEATERS

**A metal-ceramic heater is a ceramic plate inside a metal casing, manufactured using the semi-dry pressing method under high pressure, with a heating element inside.**

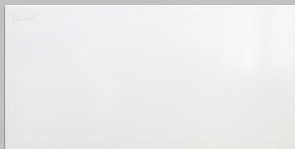

## IR heating is an efficient, safe and money-saving method of premise heating.

Direct heating of premises without intermediaries: thermal rays primarily heat solid surfaces and then the air, thus providing a natural and gentle warmth. Comfortable conditions are achieved through lower temperatures, resulting in significantly reduced power consumption and faster, more effective attainment of the desired temperature. Panels do not have exposed heating elements, thereby eliminating the risk of skin burns. Our heaters do not dry out the air, emit combustion products, or circulate dust.

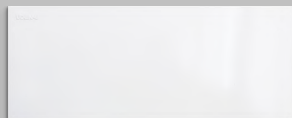

# METAL-CERAMIC HEATERS

## WALL-MOUNTED

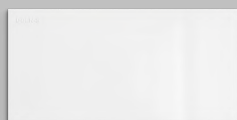

UDEN-1000

Rated consumption: 810-945 W  
Rated voltage: 220-230 V  
Dimensions (with fixtures): 1,200/594/14(35) mm  
Heated volume: 45-50 m<sup>3</sup>  
Heating area at h=2.5 m: 18-20 m<sup>2</sup>  
Surface temperature: 80±5 °C  
Weight: 20.0 kg

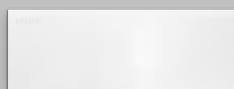

UDEN-900

Rated consumption: 720-840 W  
Rated voltage: 220-230 V  
Dimensions (with fixtures): 1,200/475/14(35) mm  
Heating volume: 40-43 m<sup>3</sup>  
Heated area at h=2.5 m: 16-18 m<sup>2</sup>  
Surface temperature: 80±5 °C  
Weight: 15.0 kg

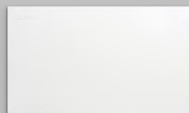

UDEN-700

Rated consumption: 585-682 W  
Rated voltage: 220-230 V  
Dimensions (with fixtures): 978/475/14(35) mm  
Heating volume: 30-35 m<sup>3</sup>  
Heated area at h=2.5 m: 12-14 m<sup>2</sup>  
Surface temperature: 80±5 °C  
Weight: 11.5 kg

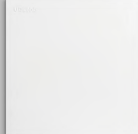

UDEN-500D

Rated consumption: 405-472 W  
Rated voltage: 220-230 V  
Dimensions (with fixtures): 975/350/14(35) mm  
Heating volume: 20-25 m<sup>3</sup>  
Heated area at h=2.5 m: 8-10 m<sup>2</sup>  
Surface temperature: 80±5 °C  
Weight: 8.0 kg

UDEN-500

Rated consumption: 405-472 W  
Rated voltage: 220-230 V  
Dimensions (with fixtures): 800/475/14(35) mm  
Heated volume: 20-25 m<sup>3</sup>  
Heating area at h=2.5 m: 8-10 m<sup>2</sup>  
Surface temperature: 80±5 °C  
Weight: 10.0 kg

UDEN-500K

Rated consumption: 405-472 W  
Rated voltage: 220-230 V  
Dimensions (with fixtures): 594/594/14(35) mm  
Heated volume: 20-25 m<sup>3</sup>  
Heating area at h=2.5 m: 8-10 m<sup>2</sup>  
Surface temperature: 80±5 °C  
Weight: 9.0 kg

UDEN-300

Rated consumption: 288-336 W  
Rated voltage: 220-230 V  
Dimensions (with fixtures): 975/240/14(35) mm  
Heated volume: 12.5-15 m<sup>3</sup>  
Heating area at h=2.5 m: 5-6 m<sup>2</sup>  
Surface temperature: 80±5 °C  
Weight: 6.0 kg

UDEN-250

Rated consumption: 207-241 W  
Rated voltage: 220-230 V  
Dimensions (with fixtures): 975/163/14(35) mm  
Heated volume: 10-12.5 m<sup>3</sup>  
Heating area at h=2.5 m: 4-5 m<sup>2</sup>  
Surface temperature: 80±5 °C  
Weight: 4.5 kg

# METAL-CERAMIC HEATERS

## CEILING-MOUNTED

### UDEN-500P

This is an ideal solution for heating commercial real estate units (shops, malls, warehouses, station buildings, fuel stations, etc.) or for local heating of premises. Heaters are fixed directly on walls or encased in Armstrong sections. As compared to wall models, they have another fixation method surface temperature ( $90 \pm 5 \text{ }^\circ\text{C}$ ) due to their location.

Rated consumption:	405-472 W
Rated voltage:	220-230 V
Dimensions (with fixtures):	594/594/14(35) mm
Heated volume:	20-25 m <sup>3</sup>
Heating area at h=2.5 m:	8-10 m <sup>2</sup>
Surface temperature:	$90 \pm 5 \text{ }^\circ\text{C}$
Weight:	9.0 kg

# METAL-CERAMIC HEATERS

## WARM PLINTH

UDEN - 200

UDEN - 150

UDEN - 100

UDEN - 100

UDEN - 150

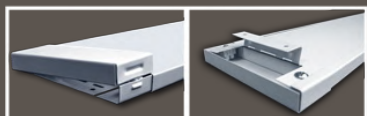

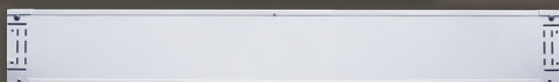

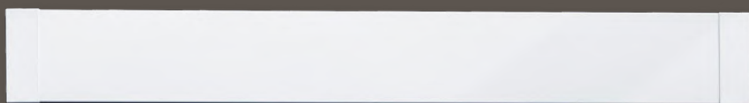

UDEN - 200

Rated consumption:	90-105 W	135-157 W	180-210 W
Rated voltage:	220-230 V	220-230 V	220-230 V
Dimensions (with fixtures):	498/130/14(35)	750/130/14(35)	998/130/14(35)
Heating area at h=2.5 m:	1.4 m <sup>2</sup>	2-3 m <sup>2</sup>	3-4 m <sup>2</sup>
Surface temperature:	80±5 °C	80±5 °C	80±5 °C
Weight:	2.0 kg	3.0 kg	3.5 kg

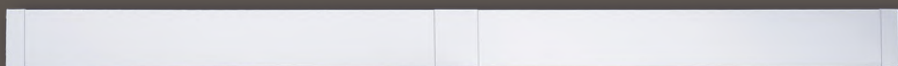

Warm plinths differ from ceiling and wall models in terms of dimensions, capacity, and installation methods. Their major distinction lies in the method of premises heating. A warm plinth, mounted along a cold wall, immediately heats (tempers) it.

Warm air dries the walls and rises slowly, creating an air curtain that prevents cold from entering the premises. The heated walls prevent excess moisture, transfer less heat to the outside, and emit heat independently. This approach avoids problems caused by cold, wet walls, corners, condensation, fungi, and mold.

# METAL-CERAMIC HEATERS

## remotely controlled

Universal wall panels with integrated heat controller and remote control is a unique technology that allows creating a comfortable microclimate in your room as easily, accurately, and conveniently as possible!

### IMPORTANT!

**In the case of parallel heaters with remote control, the total capacity must not exceed 2,000 W per one remote.**

8

### What shall we get?

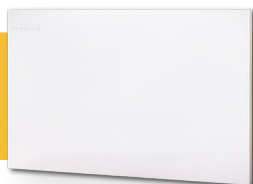

- Desired temperature in the right place. Temperature sensor integrated with the remote control that displays current and set air temperatures.
- Easy connection of multiple panels to the same remote in the room.
- Microclimate control in any place in the room

This configuration is available for the following models:

UDEN-1000;  
UDEN-900;  
UDEN-700;  
UDEN-500;

UDEN-500K;  
UDEN-500D;  
UDEN-300;  
UDEN-250;

pair for heaters:

UDEN-500, UDEN-700,  
UDEN-900

## Heat Controllers

UDEN-S® heaters are controlled with the help of heat controllers that monitor the indoor air temperature. The UDEN-S® heating system allows using any heat controller: mechanical, electromechanical, electronic programmable, and «mobile» (for Universal UDEN), as well as time relay, Smart House control system, etc.

9

### Seitron TM 001M

Each premise is equipped with one heat controller that monitors operation of heating equipment there (one or multiple panels can be available).  
If calculations are correct, the total run time of heaters will not exceed 5-7 hours a day.

### UDEN - TW

When it comes to Universal heaters, each of them is connected with the help of an individual plug-in thermostat (the thermostat with the inserted heater plug is connected to the socket)

# HEATED TOWEL RAILS

## METAL-CERAMIC HEATERS

As against conventional water driers, UDENS® heated tower rails can be installed in any place in the bathroom, without fixation to the hot water supply unit. The line is represented by two types of heated tower rails: ceramic granite and metal granite versions. This version is used to decorate a modern bathroom. Just select the appropriate model, color and quantity of holders.
